

The 4medica Web-Based Integrated OfficeSuiteSM

One comprehensive system to automate the entire Practice

The 4medica Integrated OfficeSuiteSM is the first of its kind; a fully integrated web-based practice management and electronic health record system that improves patient care, claim collection performance, regulatory compliance and reduces clinical error. It is a simple, easy, affordable and pain-free technology - a progression tool rather than a change. We let our software do the heavy lifting and make the software adjust to the doctor's office habits rather than expect doctors and their staff to change to use technology.

Features:

- Pre-populated various visits included to decrease redundant and repetitive data
- Customizable Fee Schedules - Standard, Custom Fee Schedule by Payer, Plan, Cash, Worker's Comp, etc.
- Electronic Rx & Refill with over 75,000 pharmacies nation-wide
- Lab & Results integration with major labs including Quest and LabCorp
- Record Patient Payments and create instant Receipt
- Print Superbill with patient information
- Specialist consultation reports using pre-defined templates
- Drug Interaction and Insurance Formularies
- Integrated with large clearinghouses

Benefits:

- Designed and developed by Physicians for Physicians in Private Practice
- Doctors really can chart a note and do orders, scripts and referrals 'all in 2 to 3 minutes'
- The scheduling screens provide an instant, comprehensive view of all Appointments, be it for a single Provider or multiple Providers
- Efficiency, Accuracy, Security, Availability and Usability better than paper
- 4medica Billing System Claim Cleansing Engine delivers clean Claims and keeps Patient accounts current and helps collect monies faster
- Connect Front Office, Clinical Office and Billing Office
- Most competitively priced solution, yet offers features that match or exceed expensive alternatives

Why 4medica?

1. One company, One integrated solution for entire practice automation.
2. Web-based computing available as an affordable monthly payment.
3. Designed primarily for private practices. Our software is built bottom up to meet the unique needs of private practices and not a cut down version of larger EHR systems, which were designed for hospitals and are now being sold to private practices.
4. Highly user friendly, rich in features as compared to many established and larger competitive products.
5. Constant improvements: 4medica closely listens to its customer's needs and requirements. 95% of our new monthly releases consist of requirements and requests from our existing clients.
6. State-of-the-art technology. Your practice is on the same platform that is used by Fortune 500 companies.
